rock exotica® MADE IN USA

Appalachian Hitching Post (AHP) & AHP 90° Adapter

(Sold Separately)

FOR USE WITH **2”** RECEIVER

VXAHP & VXAHP-90

The Appalachian Hitching Post (AHP) is a vehicle-mounted interface designed to securely anchor a leg section of the Vortex. It is compatible with any of the approved configurations outlined in the Vortex user manual, provided the specific rigging principles for each configuration are followed.

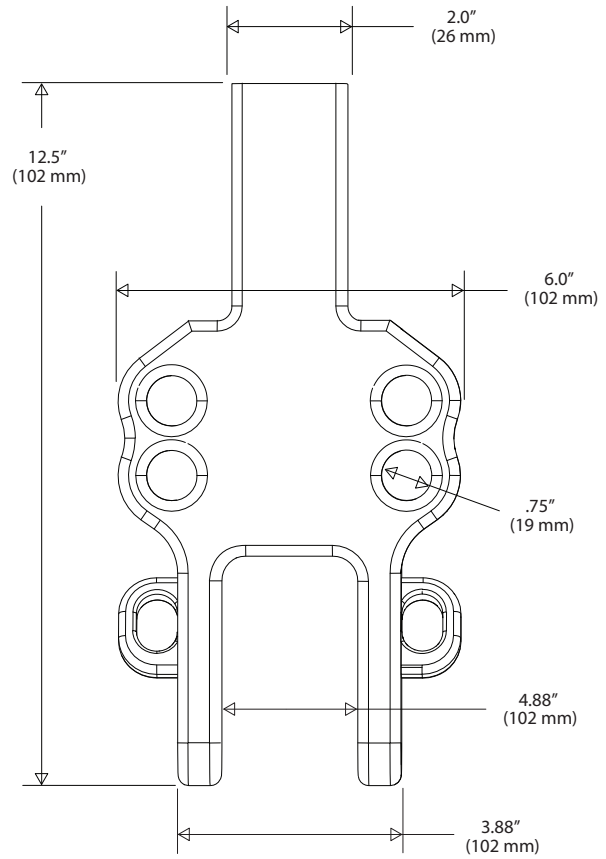

The AHP further facilitates placement of the Vortex with the optional AHP 90° Adapter, allowing for vehicle placements perpendicular to the edge.

With a rating at 36 kN, the AHP is suitable for anchoring the Vortex with a standard two-rope system, as well as providing additional anchor points for re-directs or primary connection points.

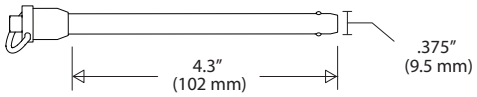

Minimum Breaking Strength (MBS):
36 kN

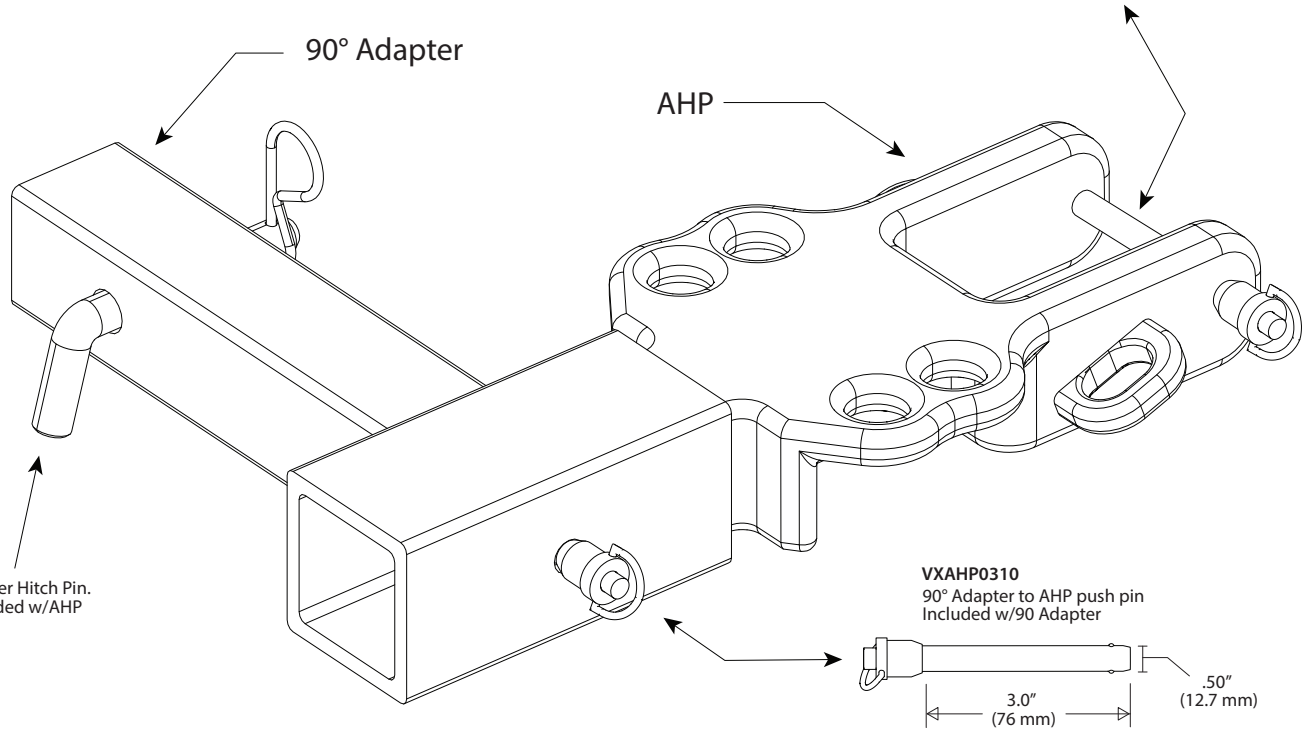

Working Load Limit (WLL):
5 kN

Weight AHP: 4.7 lbs
Weight 90° Adapter: 6.75 lbs

VXAHP0300
AHP to Vortex leg push pin
Included w/AHP

VXAHP0310
90° Adapter to AHP push pin
Included w/90 Adapter
